

What's New in NetBeans IDE 7.3

What is NetBeans IDE?

A Comprehensive & Modular IDE

- Ready to use out of the box
- Support for latest Java specifications & standards
- Other platforms too (HTML5, PHP, C/C++)
- Intuitive workflow
- Debugger, Profiler, Refactoring, etc.
- Binaries and ZIPs for Mac OS, Linux, and Windows

Simply download and run on any operating system!

What is NetBeans IDE?

A Comprehensive & Modular IDE

* Community supported

What is NetBeans IDE?

A Comprehensive & Modular IDE

A Thriving Open Source Community

Growing list of 3rd party modules (plug-ins)

Over 20 Million Downloads

Active blogging community

Available in many languages

Why Use NetBeans IDE?

Increase Developer Productivity

- Works out of the box
- Freely available
- Open source
- Support for Java standards & other popular platforms, such as HTML5
- Deeply integrated Maven support
- Extensible Java desktop framework
- Powerful, award winning GUI Builder
- Profiling and debugging tools
- Customizable and extensible

Focus Areas of NetBeans IDE 7.3

The Smarter and Faster Way to Code

- HTML5 rich client-side web and mobile development
- Java Editor enhancements
- Miscellaneous Enhancements
 - Java EE
 - JavaFX
 - Maven
 - Groovy
 - PHP
 - C/C++

HTML5 Rich Client Development

The Smarter and Faster Way to Code

- Accelerated HTML5 Development
- Live Web Preview and Responsive Web Design
- Rewritten JavaScript Editor on Nashorn
- JavaScript Debugger
- CSS3 Editor, Style Editor, and Rule Editor
- Backbone.js Client Generation from Existing RESTful Web Service Project

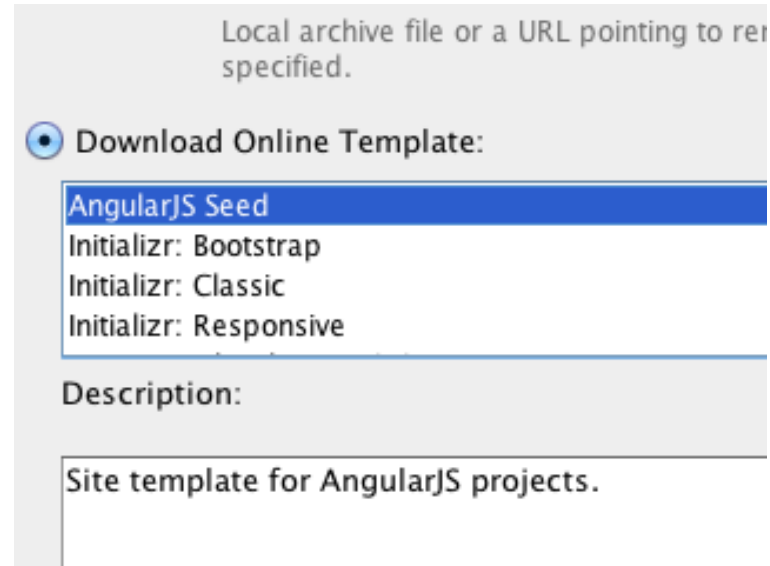

Accelerated HTML5 Development

The Smarter and Faster Way to Code

- Create applications from popular templates
- Open existing HTML5 applications
- Open applications from ZIP file
- Use popular tutorial samples
- New JavaScript Library Manager

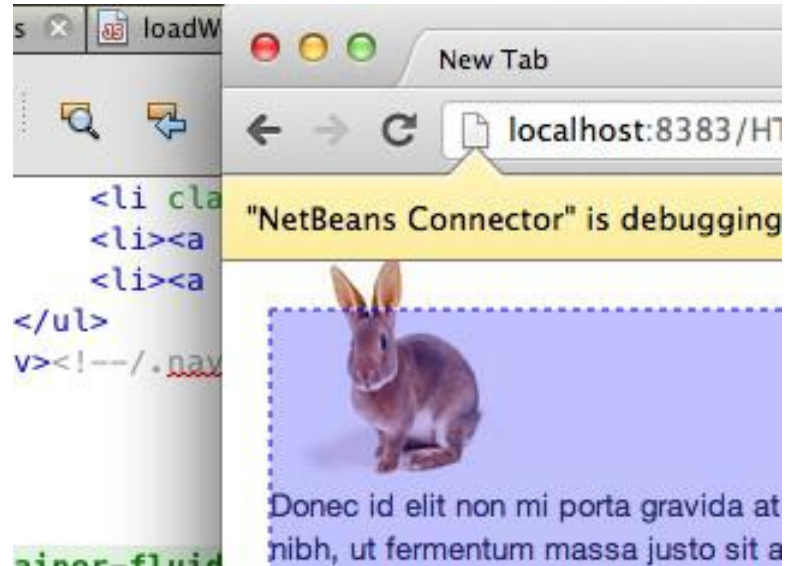

Live Preview & Responsive Design

The Smarter and Faster Way to Code

- Deep integration with WebKit API
- Integration with embedded browser
- Instant feedback from page design
- Select in browser, see related code in IDE, and reverse... without needing to save
- Multiple form factors, e.g., desktop or mobile, in browser

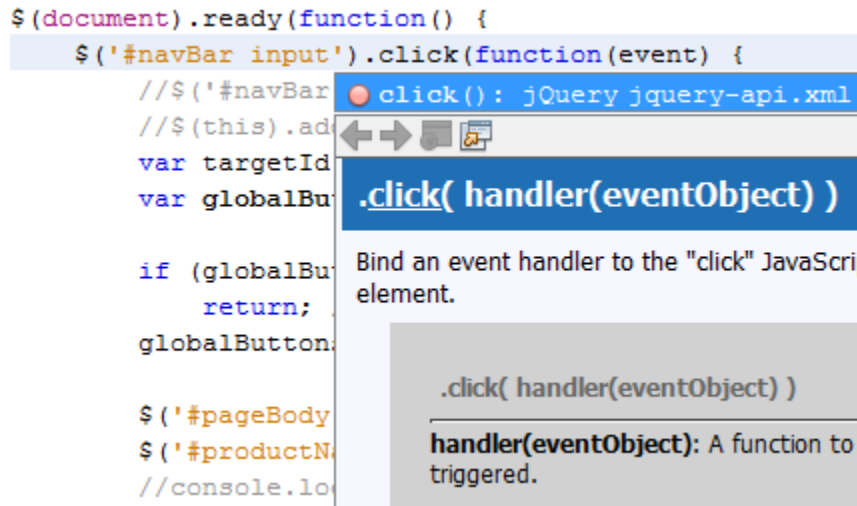

JavaScript Editor on Nashorn

The Smarter and Faster Way to Code

- Early build of Nashorn used for parsing
- Syntax coloring, code completion, pattern recognition, jQuery, and JSON
- JavaScript refactoring
- Many customization settings in Options window

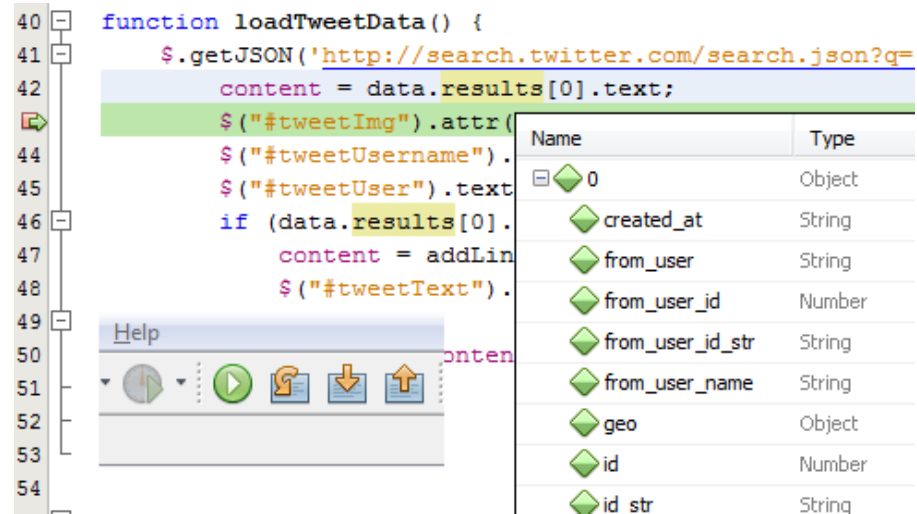

JavaScript Debugger

The Smarter and Faster Way to Code

- HTML5 applications are automatically in debug mode
- Set breakpoints in JavaScript file, on Line, DOM, Event, or XMLHttpRequest
- Refresh the browser and immediately you can step through code
- Use Debugger windows to monitor watches, threads, and breakpoints

```
40 function loadTweetData() {
41     $.getJSON('http://search.twitter.com/search.json?q=
42     content = data.results[0].text;
43     $("#tweetImg").attr(
44     $("#tweetUsername").
45     $("#tweetUser").text
46     if (data.results[0].
47         content = addLin
48         $("#tweetText").
49
50
51
52
53
54
```

Name	Type
0	Object
created_at	String
from_user	String
from_user_id	Number
from_user_id_str	String
from_user_name	String
geo	Object
id	Number
id_str	String

CSS3 Editors

The Smarter and Faster Way to Code

- Inspect and edit CSS from CSS Styles window
- Inspect styles applied to HTML elements in Navigator window
- Change in CSS Editor is immediately reflected in the browser

index.html - CSS Styles	
Selection	Document
img - Properties	
Property	Value
▶ border	1px solid
float	left
margin-right	20px
color	#333333

Backbone.js Client Generation

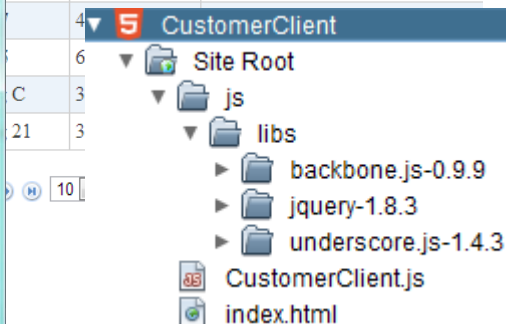

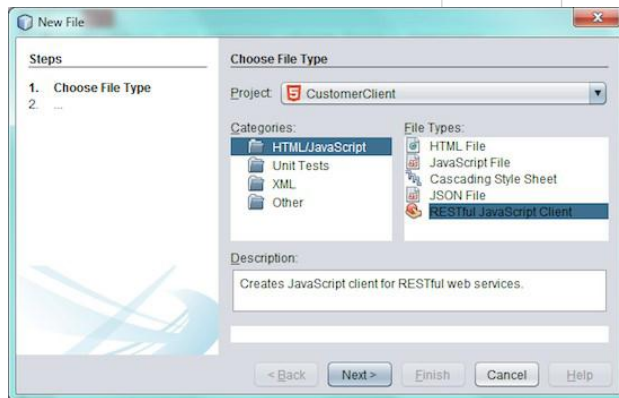

The Smarter and Faster Way to Code

- Create or open an HTML5 application
- Generate a Backbone.js frontend from RESTful web services
- JavaScript file with HTML file is generated and can immediately be opened in the browser
- Expose a database in an HTML5 application within 5 minutes

Create

Community Feedback

The Smarter and Faster Way to Code

Andrea Panisson @andypanix

Feb 11

The new support for HTML5 projects in NetBeans 7.3 is really cool!

bit.ly/14N8vzK

Shorty Dre 8) @StrictlyGeeky

Feb 16

I am already in love with **Netbeans** RC2. I cannot wait for the official release. #Web #Dev #Netbeans #HTML5

John Yeary @jyeary

Feb 1

@NetBeans 7.3 RC1 is smooth. Its new editor found some HTML/JS errors in existing files that were previously undetected. Very cool.

Bruno Borges @brunoborges

Jan 28

By the way #NetBeans 7.3 RC1 comes with Project #Easel! Debug HTML5 and JavaScript apps between NB and your browser!
netbeans.org/community/rele...

JavaScript News @javascript_news

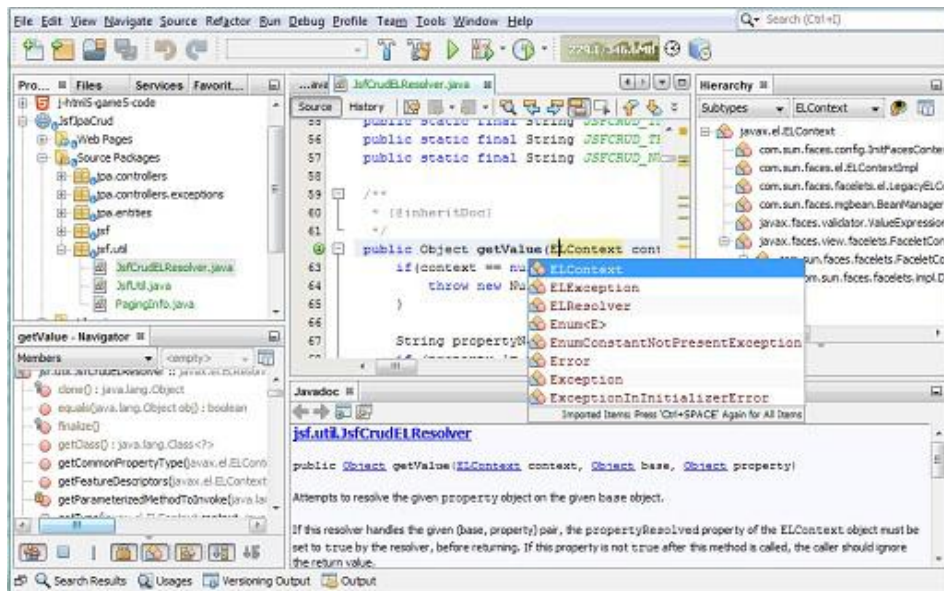

NetBeans 7.3 will have first class support for HTML5/JavaScript/CSS3 bit.ly/Uj4x0g

Be More Productive When Coding

Improved Java Editor

- Java Editor is main feature of NetBeans IDE
- Developed in close co-operation with Java SE Team
- First editor to support Java technologies, e.g., Java, Java EE, JavaFX
- “javac” is our parser, all language features are always in sync with Java

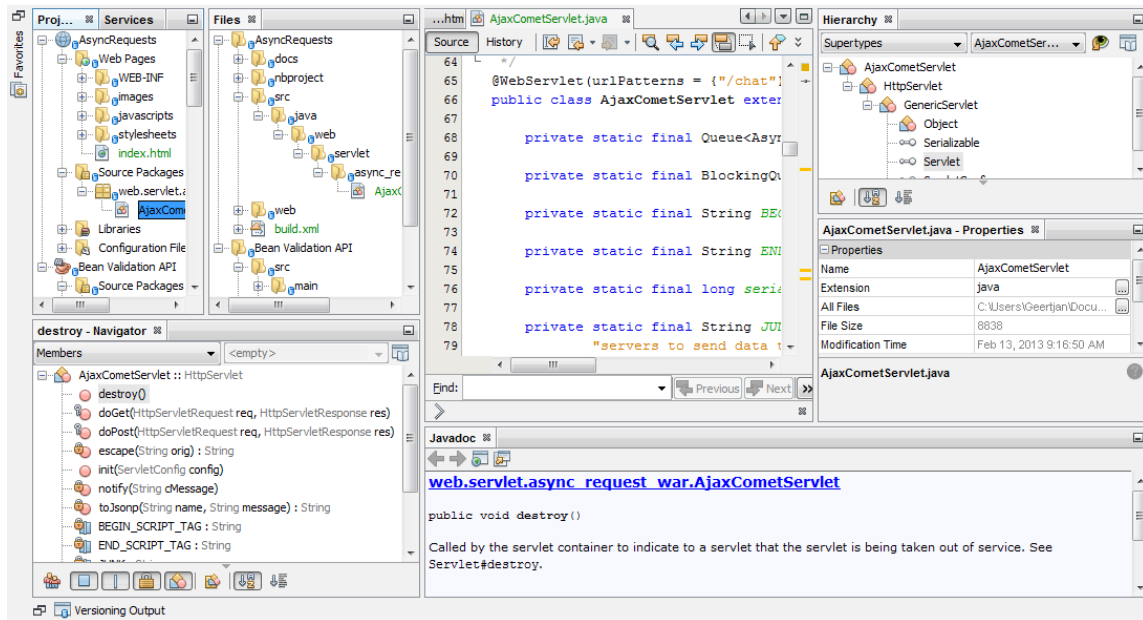

Improved Java Editor

Enhanced Code Navigation

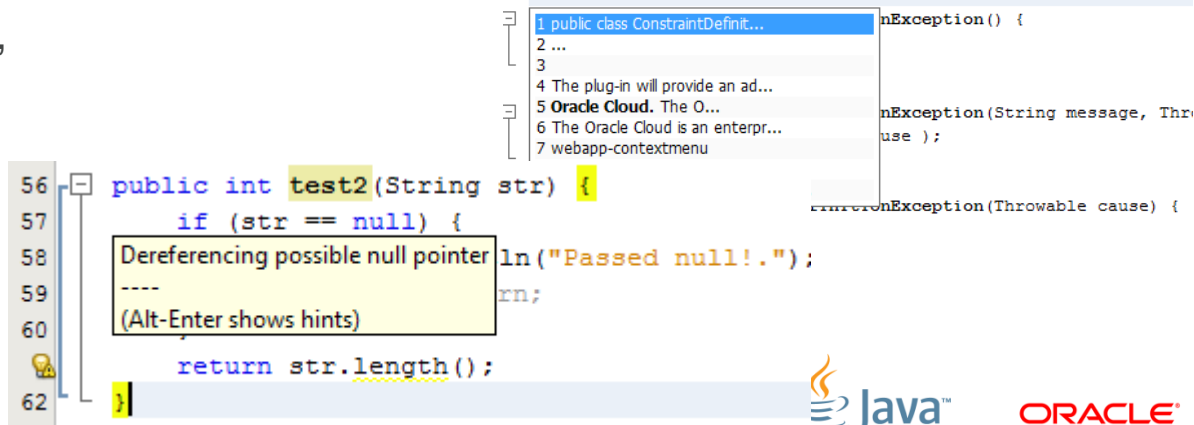

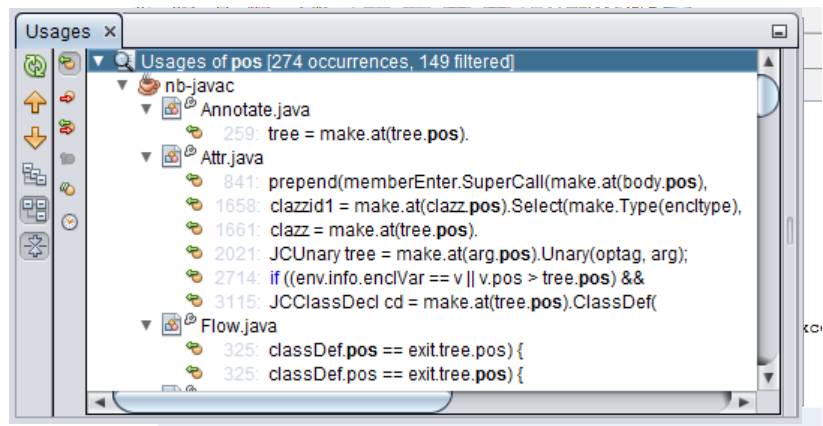

- Rewritten Hierarchy window for supertypes and subtypes
- New Breadcrumb Toolbar beneath editor
- New Brace Matching Bar above editor

Improved Java Editor

Enhanced Tools

- Access to clipboard
- Specify “save actions” to be performed when files are saved
- New hints and refactorings, e.g., identify potential `NullPointerException`s
- Find Usages filters

New Features & Enhancements

The Smarter and Faster Way to Code

- Java EE
- JavaFX
- Maven
- Groovy
- Profiler
- PHP
- C/C++

Support in NetBeans for Java EE

Out of the Box Java EE Support

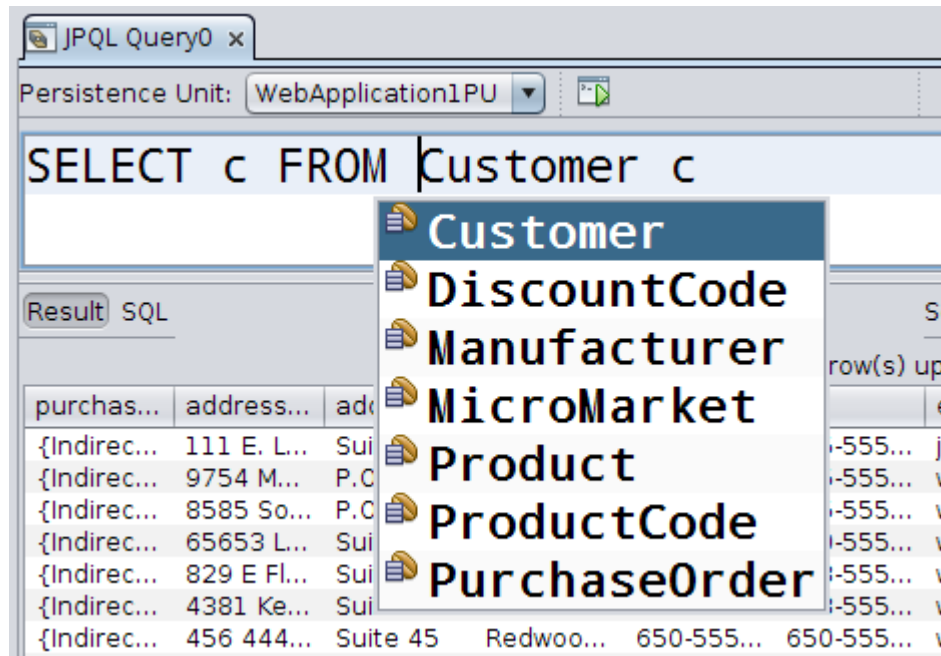

- Developed in close co-operation with GlassFish and WebLogic teams
- Best in breed GlassFish integration, strong support for WebLogic and other servers
- First day support for standards, e.g., Java EE 6
- Ready to use out of the box

New in Java EE

Out of the Box Java EE Support

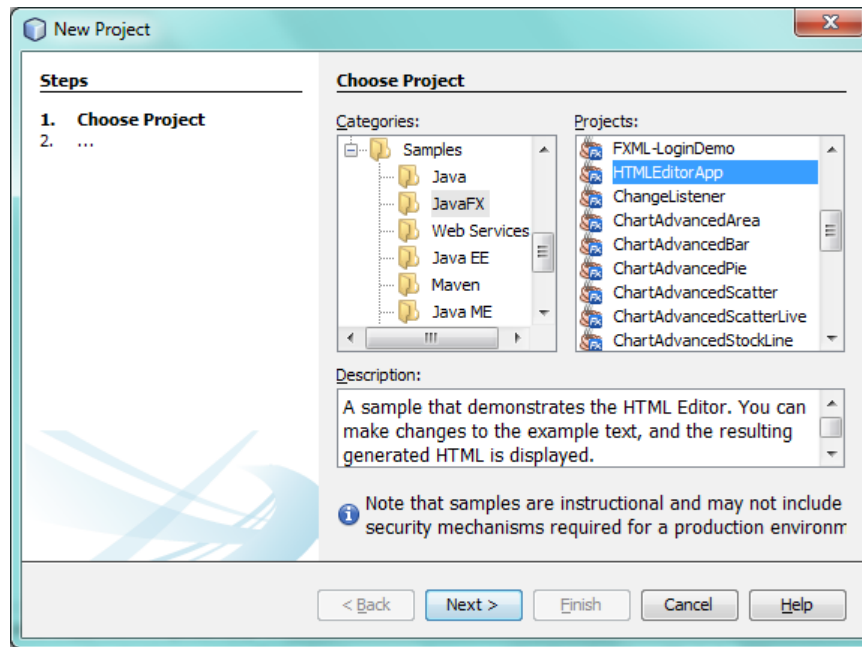

- JPQL Query Tester
- From RESTful Web Services to JavaScript without coding
- Groovy integration

Support in NetBeans for JavaFX

Out of the Box JavaFX Support

- First IDE to provide JavaFX tools
- Developed in close co-operation with the JavaFX team
- Supports create, edit, compile, deploy cycle
- Integrated with Scene Builder
- Library of ready to use samples out of the box

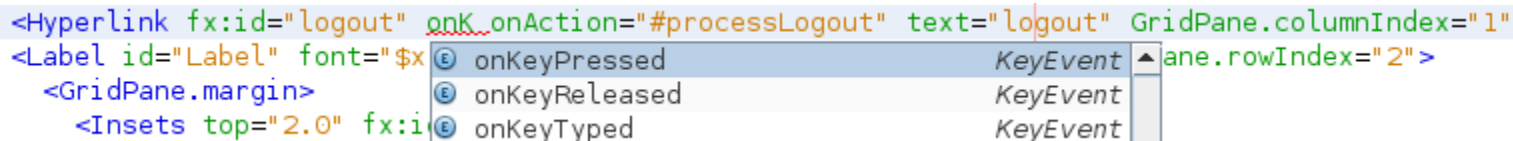

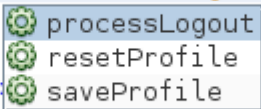

New in JavaFX

Out of the Box JavaFX Support

- Code completion for FXML Source Editor
- Generate controllers or update existing controllers
- Partial validation with error hints
- JavaScript event handler syntax colors and code completion

```
</Label>
<Hyperlink fx:id="logout" onAction="#" text="logout" GridPane.columnIndex="1"
<Label id="Label" font="$x1" text=
  <GridPane.margin>
    <Insets top="2.0" fx:id="x3" /
  </GridPane.margin>
</Label>
```

```
<Hyperlink fx:id="logout" onK_onAction="#processLogout" text="logout" GridPane.columnIndex="1"
<Label id="Label" font="$x1
  <GridPane.margin>
    <Insets top="2.0" fx:i
```

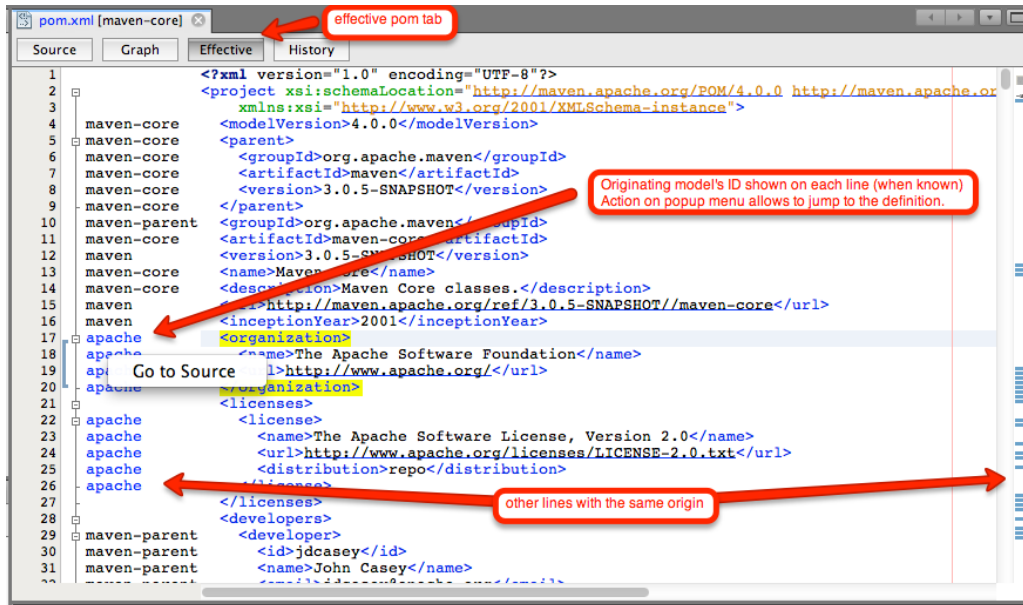

New in Maven

Out of the Box Maven Support

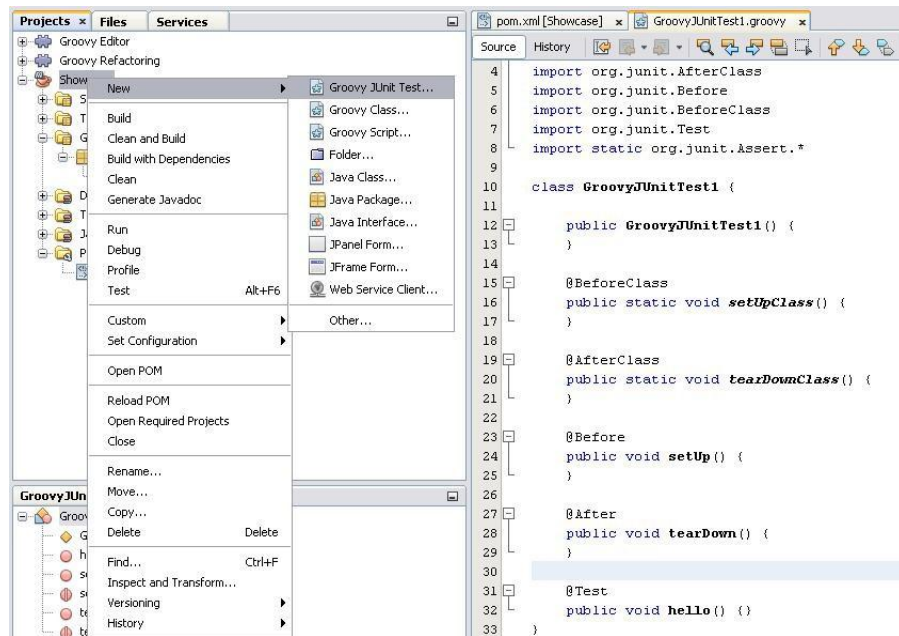

- Less memory needed for Maven projects
- Effective POM tab shows origin of elements
- Code Generator for POM files to generate license headers

New in Groovy

Out of the Box Groovy Support

- Groovy 2.0.5
- Integration with Java EE
- Groovy JUnit
- Find Usages
- Rename Refactoring

New in the NetBeans Profiler

Out of the Box Java Profiler Support

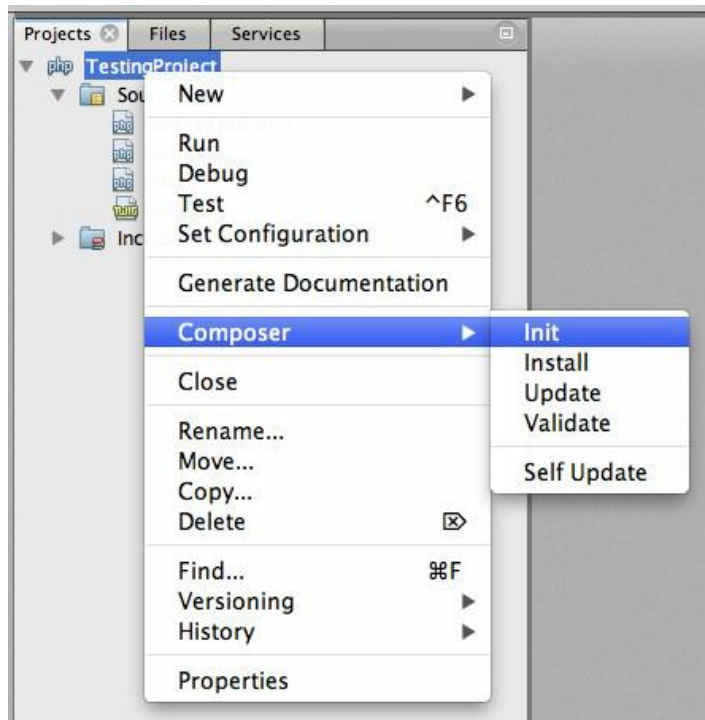

- Simplified memory profiling
- Memory profiler provides sampled histograms of live objects
- CPU snapshots can be compared, just like memory snapshots

New in PHP

Out of the Box PHP Support

- Composer integration
- Detect and resolve memory problems
- Enhancements for
 - Smarty
 - Twig

New in C/C++

Out of the Box C/C++ Support

- **Memory usage improvements.** Requires 2x less memory for big projects.
- **Parser.** Speed and scalability improvements.
- **Relocatable Index.** Project index may be kept with the project metadata and used when project is moved.
- **VCS Ready Projects.** Major improvements in how projects are stored.
- **Breakpoint Groupings.** Per file, per project, per type.

Next Steps

1. Download Netbeans IDE

2. Create a user account

3. Participate in NetBeans community
